8 COMMENTS / ADDITIONAL INFORMATION

8.1 Do you have any comments or additional information ? **Yes** Yes/No

Question Number	Line Number	Comments
1.7	112	Sugar products are not classified as Hazardous, but an SDS is available upon request. Very fine sugar dusts may be explosive. Sugar has a high BOD loading, so spillages and waste should be disposed of with consideration given to its environmental impact.
3.2.3	284	All Sugar Australia facilities are certified to BRC Global Standard - Food.
5.2	703	Kosher and Kosher for Passover certified.
6.5	770	A Best Before of 2 years from packing may be applied to meet requirements of the export market, even though the product has a shelf life well in excess of 2 years.
7.0	816	Refined sugars are made by a very-high-rate, highly-automated, continuous process. In-process streams and finished product are tested according to a documented snap sampling and testing regime to verify process control effectiveness and compliance to specifications. Thus there is no such thing as a "batch" against which an analytical result can be assigned, and consequently Certificates of Analysis are not offerred for crystal refined sugar products. Certificates of Conformance may be offerred instead.

8.2 ADDITIONAL MANUFACTURING SITE INFORMATION (if required)

When nominating product is supplied from more than one manufacturing site, the details provided must be applicable to product coming from any of the sites. For example, if particular allergens occur at only one site then the information provided in the form should identify that the allergens are present even though batches of product made at other sites may be allergen free.
