LEADING MANUFACTURERS OF MEAT PROCESSING MACHINERY

Thompson Hydraulic Sausage Fillers

The Thompson Oil Hydraulic Sausage Fillers are Hygienic Smooth Running Knee-Operated Machines. Release of the knee control automatically stops the filling process. The large barrel diameter makes it easy to fill the sausage meat into the chamber. A Quick Release Twist Lock Lid ensures Fast Refill Time ... no time consuming lock down threads! For ease of cleaning, the Lid and Stainless Steel Barrel are totally removable.

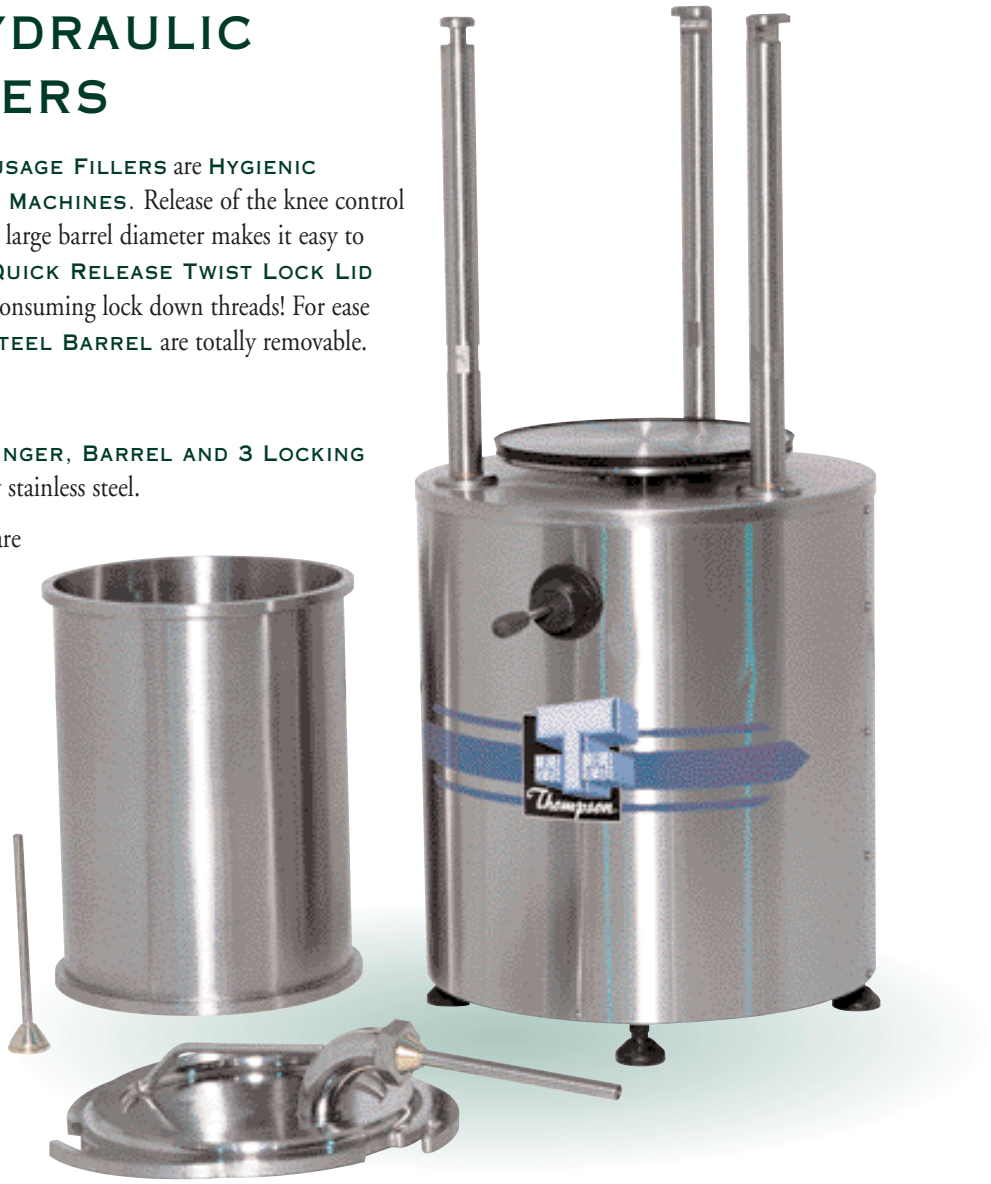

Construction

High quality stainless steel. The Lid, Plunger, Barrel and 3 Locking Bars are manufactured from high quality stainless steel.

Only top quality heavy duty components are used in manufacture, this reduces the risk of breakdown and extends the life of your investment.

Thompson 70lb Water Filler

Optional stainless steel lid is available on request.

Sausage Filler Specifications

Machine/ Capacity	Overall Height	Nozzle Height	Diameter	Weight	Motor	Shipping Weight	Shipping Size	Volts	Full Load Current
27kg Sausage Filler	1300mm	1250mm	500mm	200kg	.75 kW (1hp) 4 pole	240 kg	580 x 580 x 1360H (mm)	415V 3 phase	2A
20kg Sausage Filler	1150mm	1100mm	500mm	180kg	.75 kW (1hp) 4 pole	220 kg	580 x 580 x 1560H (mm)	415V 3 phase	2A
Water Filler	1200mm	1100mm	500mm	50kg	N/A	85 kg	580 x 580 x 1560H (mm)	N/A	N/A
